

The Future Design of Workplace

In the past few years, especially after the outbreak of the pandemic, office design and applications have had revolutionary changes from the traditional, rigid office design to focusing on convenience, agility, and flexibility of installation, in order to adapt to the fast-changing business world, as well as reduce the cost of rental offices.

Create flexible multi-purposes space

The latest trend of interior design is building with functional-based units to create multi-purposes space for more flexibility. Corporates can adapt modular office design to optimise the usage of workplace with an extremely low rental expense.

Suit individual business needs

The modular office design takes the collaborative nature of an open-plan office, and combines it with customized private spaces to suit individual business needs, but without the high costs of starting the interior design process from scratch. That provides corporate flexibility to decide office location, and the ability to adapt the latest technology when the new era comes.

Innovative workspace technology

The modern & meticulous office design solution can reduce over 50% of the original office size with the aid of hybrid workplace technology such as smart lighting, smart pods, interactive whiteboards, virtual conference solutions etc., which allows corporations to have the flexibility to allocate its resources and adapt to the latest working styles.

Creating a workplace for tomorrow

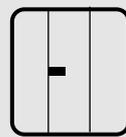

Space Plan

Smart Lighting

Modular Furniture

SmartPod

E&M

Smart Devices

Under the proper design and planning, the modular office design could reduce over 50% of original space.

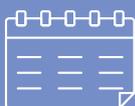

Traditional office

Modular workplace

Ricoh Modular Hybrid Workplace Services

Quick set-up, reduce lead time

The modular parts are designed and produced before the project starts, so the renovation can be completed in less than a month*, reducing rental and staff costs lost during the office redesign period.

Lower cost of renovation

Modular office elements provide multifunctional purposes to meet various work functions and enable hybrid workstyle. The companies do not need to bear the risk and the cost of adopting new offices and pausing company operations.

Environmentally friendly

The modular equipment and furniture is made of eco-materials that fulfilled the government limitation of formaldehyde, benzene and TVOC, it shortens the move-in date and saves cost from renovation.

How to build the most suitable modular workplace for my company?

Built by functionality, not by departments

Focusing on the functionalities of the workspace instead of allocation of department members. For example: The distribution of the meeting room systems, the video conference devices, different user habits and employee privacies.

Built for the customer experience

The flexible modular design allows your company to respond to the partners' feedback and agile working style, to enhance the cooperation and communications between different parties.

Consult for professional advice

Our experts can advise on the most suitable design based on your employee behavior, company development scheme, and budget. If you have any questions, please consult our expert team here.

*remarks: Less than a month to build a new workplace. Assumed 5,000 sq.ft. bare-shell office with raised floor in good condition. Not included the production & logistic lead time of modular system furniture.
